PROJECTS

Calling History, (Data Structures in C language)

Online shopping, C++

- Online shopping is a form of electronic commerce which allows consumers to directly buy goods or services from a seller over the Internet using a mobile app.

Food Delivery Website, (HTML,CSS)

- The Online Food Ordering System, is highly customizable, allows the restaurant employeesto easily manage the site content, most importantly the menu.

iCoder Website, (Bootstrap)

- iCoder is a website template. I designes this when I was learning Bootstrap. 7 HTML pages. Easy to edit, contact form.

E-Commer website, (Django Framework)

- An e-commerce website is one that allows people to buy and sell physical goods, services, and digital products.
